Full-Stack Web Developer Training Program   June 2021

SKILLS & QUALIFICATIONS

Technical: HTML 5, Javascript, CSS 3, SQL, Node, React, MongoDB, Git, Express.Js, Mongoose, JQuery, Bootstrap 4

PROJECTS

Payroll Application, https://github.com/painteon/Coding-Exercise

- Created a payroll application that allows an employer to track and update the weekly earnings of each employee, as well as add and delete new and old employee, respectively.
- The payroll application also has a scheduling feature that organize when employees are come in on specific days of the week.

Notes WebApp, http://ancient-tor-93942.herokuapp.com/

- Created an application that saves user information in the form of notes that can be referenced later using local storage and powered by React.js.
- The notes are saved and deleted from the local storage in order to create a semi-permanent holding space for the users information.

Grocery Store Website, https://hidden-beach-41717.herokuapp.com/

- Constructed a mock landing page capable of initiating and completing store front transactions similar to industry standard store websites.
- It utilizes the Stripe API to conduct transactions through a Node/Express.Js server.

Portfolio Website

- A showcase of all the applications/websites that I have constructed to date.
- Every asset on the page, from the SVG sun to the strobe animations were original constructions I designed/coded.

Twitch Streamer Website, https://arcane-eyrie-36117.herokuapp.com/

- It integrates with the Twitch API to feed live data on the streamers follower count
- This website was created in collaboration with an active twitch streamer, at the time. Utilizing their input to deliver a website they love.
